

Franchise

Our Franchise Law Department offers a wide range of legal services to franchisors, franchisees and prospective franchisees. Our clients include national franchising systems, as well as start-up franchisors.

Services to franchisees and prospective franchisees include review and evaluation of Franchise Disclosure Documents (FDD) and franchising agreements, negotiations with franchisors, franchising related disputes and sale of franchises.

We regularly represent national franchisors in litigated matters involving enforcement of their franchises and related agreements, royalty collections, intellectual property protection and enforcement of non-competes.

Our experienced attorneys also represent companies seeking to grow their business through franchising or licensing opportunities.
